• Image Detection Machine Learning Based Project

I do this as a mini-project for the Machine Learning Course. To do this, I used the Keras CIFAR 10 data set, and it gives the correct image type when we give the picture.

• Voice Emotion Recognition Machine Learning Based Project

I built this as my final project in the machine learning course. I used the Kaggle Ravdess voice emotion dataset for this. I refer you to YouTube videos for building this. This is a small ML project, but this is the first step of my AI journey.
