Link : https://github.com/shashi2024/Y1S2project

- **Forward - Stress & Study management app for learners**

Technologies : Android Studio, Kotlin, Figma, GIT Copilot

Skills : Innovation & Creativity, Fast Learning

References : GIT Copilot, ChatGPT, Online Lectures & YouTube

Link : https://github.com/shashi2024/myapp

- **PuzzlePluz - Gaming App**

Technologies : Android Studio, Kotlin, Figma, GIT Copilot

Skills : Innovation & Creativity, Fast Learning

References : GIT Copilot, ChatGPT, Online Lectures & YouTube

Link : https://github.com/shashi2024/PuzzlePluz

- **Image Detection Machine Learning Based Project**

I do this as a mini-project for the Machine Learning Course. To do this, I used the Keras CIFAR 10 data set, and it gives the correct image type when we give the picture.

- **Voice Emotion Recognition Machine Learning Based Project**

I built this as my final project in the machine learning course. I used the Kaggle Ravdess voice emotion dataset for this. I refer you to YouTube videos for building this. This is a small ML project, but this is the first step of my AI journey.
